

Resetting your watch using a Macintosh

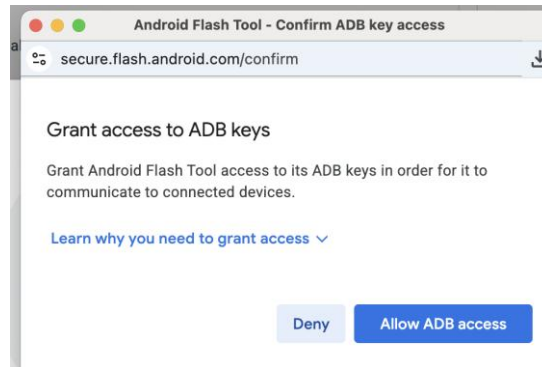

Make sure watch is connected to computer through the charging cable

Go to flash.android.com

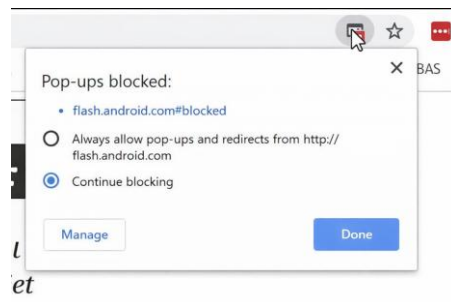

Click on “Get Started”

Click on “Already installed”

On the pop up window click on “Allow ADB access”

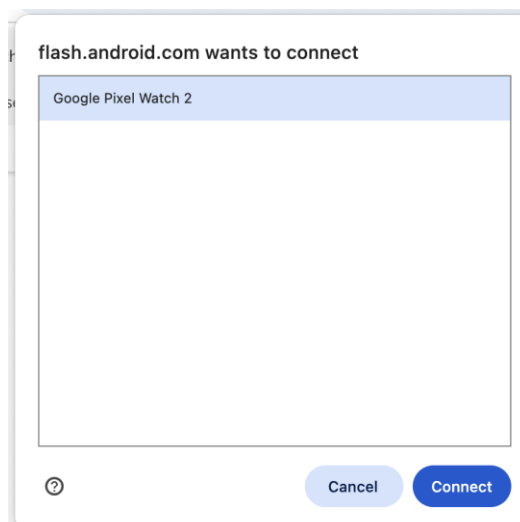

If a pop up does not appear it may be that it has been blocked. From the address bar at the top click the “pop up blocked icon” and select always allow from “flash.android.com”

On “Select a build” screen, click on “+ Add new device”

+ Add device

Pop up window should have “Google Pixel Watch 2”, click on it and click “Connect”

From “Popular builds”, click on “Back to Public”

Select a build

Selected device:

 **Pixel Watch 2 - Bluetooth/Wi-Fi (aurora)**
38201RTJWW75T8 | BP1A.241121.002 (12693108) 

Connected

Find a build to flash

Enter a target (e.g. walleye-user), build id (e.g. 7124944) or release candidate name (e.g. RQ2A.210305.006)

[Back to Public](#)

Factory reset the device to the latest public build.

[More releases](#)

A full list of public releases for your device.

On “Selected build” click on “Install build”

Installing build

Selected device:

 **Pixel Watch 2 - Bluetooth/Wi-Fi (aurora)**
38201RTJWW75T8 | BP1A.241121.002 (12693108) 

Connected

Selected build:

 **BP4A.251205.005.W7 (14500072)** 

aurora-user (signed) | 16.0.0 (Android 16) | API level 36

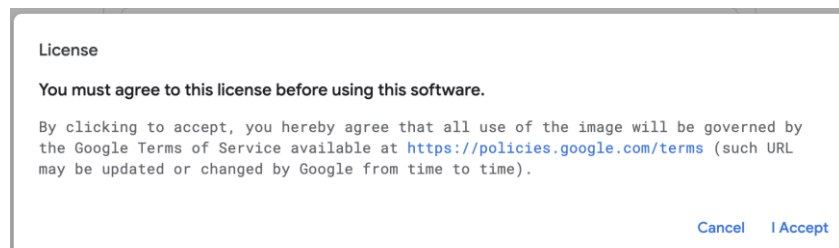

Wipe Lock Force Flash

[Select a different build](#) Install build

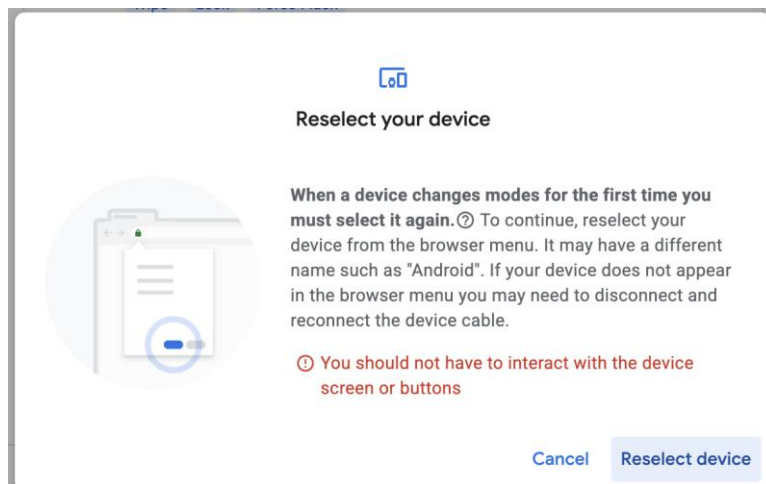

On Popup window, click on “Confirm”

On follow up popup window, click on “Accept”

In the process, it will prompt you to "Reselect your device"

Choose “Google Pixel Watch 2” from the pop up (as before) and click Connect

During the processing (approx 5-10mins) the progress bar will appear.

Current status:

 **Downloading software**

Download BP4A.251205.005.W7 (14500072)
Downloaded 47.17MB/1.82GB

During the installation process:

-  Do not interact with the device unless instructed to do so by this page
-  Do not unplug your device

At the end of installation, it will ask to confirm locking the device. Click Start and then select “Lock bootloader” on watch. Once complete select Done.

 Lock Device

 Lock Device

Your bootloader must be locked to complete the process.

Please follow the steps on the device screen to confirm locking the device. You may need to use the volume buttons to navigate the list of options.

[Cancel](#) [Start](#) [Done](#)

The device will then reboot and display a pairing symbol which means it can be repaired to your device using your own credentials.

 Installing build

Selected device:

 Pixel Watch 2 - Bluetooth/Wi-Fi (aurora)
38201RTJWW75T8 | BP1A.241121.002 (12693108)

Selected build:

 BP4A.251205.005.W7 (14500072)
aurora-user (signed) | 16.0.0 (Android 16) | API level 36

[Wipe](#) [Lock](#) [Force Flash](#)

Current status:

 **Install Complete**
The build has been successfully installed. It is now safe to unplug your device.
